Address: Addis Ababa, Ethiopia

Professional Summary

Final-year Software Engineering student and Full-Stack Developer experienced in building production applications with React, Next.js, TypeScript, NestJS, Node.js, and PostgreSQL. Currently developing a remittance platform at Aquila ICT Solution while building applied machine-learning systems across predictive modeling, NLP, and RAG. Awarded 2nd place at the Cursor AI Hackathon Ethiopia and completed Kifiya AI Mastery with distinction.

Skills

Technical Skills

Python, TypeScript, JavaScript, SQL
React, Next.js, Tailwind CSS,
Node.js, NestJS, Express, Django,
REST APIs, PostgreSQL, SQLite,
ChromaDB, scikit-learn, NLP, RAG

Software Tools

Git, GitHub Actions, Docker, Streamlit,
DVC, pytest, Figma

Soft Skills

Team collaboration, Creative thinking,
Self-motivation, Problem-solving,
Communication, Fast learner with high
adaptability

Experience

Full-Stack Developer — Aquila ICT Solution

Addis Ababa, Ethiopia | Mar 2026 – Present

- Develop and maintain a remittance platform using Next.js, NestJS, and TypeScript.
- Build responsive interfaces, integrate REST APIs, and deliver production-ready features in an Agile team.

AI/ML Trainee — 10 Academy / Kifiya AI Mastery

Remote | March 2026

- Participating in an intensive 3-month program focused on AI/ML foundations, NLP, and model deployment.
- Working on weekly real-world challenges such as sentiment analysis, NER, model evaluation, and interpretability using Python and Hugging Face.
- Collaborating with peers and mentors in a fast-paced remote setting.

Brana Software Solution - Addis Ababa - Ethiopia

Inperson | Oct 2024 – Nov 2024

- Active front-end contributor to the Brana ERP project, implementing design mockups into functional components using Next.js and engaging in iterative UX/UI refinement.
- Managed project timelines and task allocation, ensuring the successful on-time delivery of a functional product.

Projects

NGO Project Management System | [GitHub](#) | [Live Demo](#)

Full-stack platform for managing NGO programs, budgets, beneficiaries, reporting, and monitoring and evaluation.

Tech Stack: React, TypeScript, Node.js, PostgreSQL, Data Visualization

Mahbere Ahaw Seminary LMS | [GitHub](#) | [Live Demo](#)

Distance-learning platform supporting monthly modules, study materials, assignment submission, instructor assessment, and centralized student management.

Tech Stack: Next.js, NestJS, PostgreSQL, Docker

Insurance Risk Analytics & Predictive Modeling | [GitHub](#)

Machine-learning platform for insurance claim prediction, risk analysis, and premium modeling.

Tech Stack : Python, pandas, NumPy, scikit-learn, XGBoost, SHAP, Streamlit, pytest

RAG Complaint Chatbot | [GitHub](#)

Retrieval-augmented generation assistant for answering questions about consumer complaints with cited evidence.

Tech Stack: Python, Sentence Transformers (MiniLM), ChromaDB, Starlette, RAG

Awards & Recognition

2nd Place — Cursor AI Hackathon Ethiopia | 2026 | [Link](#)

- Built **Negarit AI** during a 24-hour hackathon, competing against 300+ developers across 60 teams.
- Awarded incubation support from the Ministry of Innovation and Technology (MinT) through Innobiz-K, along with \$1,500 in Cursor credits.

Kifiya AI Mastery — With Distinction | Mar 2026 | [Link](#)

- Completed a 12-week applied AI program covering data engineering, machine learning, generative AI, RAG, MLOps, and deployment.

Education

Bachelor of Science in Software Engineering - Addis Ababa University - Ethiopia - Sep 2023 - Present

Specialization in Machine Learning & Artificial Intelligence

- CGPA: 3.5/4.0 after 5 semesters.
- Relevant Courses: Fundamentals of Artificial Intelligence, Fundamentals of Machine Learning, Data Structures and Algorithms, Mobile and Web Application Development, Software Engineering.

ALX Software Engineering — Back-End Web Development

- ALX Africa | 4-Month Programme | Completed Nov 2025 | [Link](#)
